All listed parts are subject to prior sales/availability. Should the spare parts or components you are looking for not be listed in this catalogue, please send us your detailed specific requirements and we would be happy to investigate the world-wide availability for you. Parts that are not available through direct deliveries from stock can be drawn from approved surplus military stocks, unbranded manufacturers and from the original manufacturer's production facilities. An extensive international network of partners ensures rapid and competitive deliveries. Due to constantly ongoing deliveries, UMS' stocks continuously change and this catalogue should therefore not be regarded as the company's limited and/or fixed supply capabilities. For any questions or enquiries, please contact us at [info@ums.as](mailto:info@ums.as)
